

CREDIT SERVICES

CreditXpert

Uncover more opportunities, close more loans

CoreLogic Credco offers CreditXpert, a suite of intelligent software solutions that help you uncover more lending opportunities. CreditXpert helps you approve more applicants and eliminate guesswork by providing helpful insights, predictions, and more thorough credit analysis.

CreditXpert Essentials™

CreditXpert Essentials helps you determine the best course for maximizing an applicant's credit score through pay downs, balance transfers and opening new accounts. You can also find the most cost-effective way to achieve a particular score increase, or the maximum score increase for a given amount of cash.

CreditXpert Essentials provides a detailed analysis that identifies the top positive and negative credit factors, as well as their related tradelines, so you can focus on needed changes and avoid disrupting what is already working.

CreditXpert Detective™

CreditXpert Detective automatically identifies opportunities to improve credit scores by updating incorrect, missing and outdated information. This helps you find all potential updates, or just as many as you need, to improve a credit score. Its embedded expert knowledge and analytical sophistication scrutinizes credit report data within and across tradelines and bureaus.

CreditXpert What-If Simulator™

CreditXpert What-If Simulator includes predefined scenarios for ease of use and custom scenarios for full flexibility. Its predictive capabilities let you safely test your options, and simulate combinations of your own to see if you can raise an applicant's score to qualify for an approval or a better rate.

For more information on CreditXpert, contact a CoreLogic Credco sales associate at (800) 255-0792 or visit us online at www.credco.com.
